

Mama K and The Big Love

Mama K and The Big Love have released their first studio album! With band members ranging from their teens to their fifties, the analog approach took each of their unique sounds and blended them together to create a soulful, energetic album. While their first goal was recording, Mama K and the Big Love have proved themselves to be passionate and engaging performers, growing a flock of loyal supporters. With their call-and-response songs, they present a humorous "heathen gospel" sound that makes them hard to ignore.

Australian Radio and Media have been quick to catch onto the record and have shown a warm welcome....

"a whopping sound... powerhouse call-and-response vocals that have a live, sweaty-club energy... a sound as warm as the hug of an old friend."

John Shand, Sydney Morning Herald

"On first hearing Tasmania's Mama K & The Big Love debut release Blind my first thought was 'where has this band been hiding?'. 'Blind' has loads of excellent soul, funk & gospel"

Graham Henries, Encore 96.3FM

"great musicianship, top quality songs.. and that deep down soul/RnB"

David Roman, 2SSRFM 99.7, The Mystery Train, Panel Member Australian Blues and Roots Airplay Chart

"Mama K & The Big Love are from the Deep South of Australia — Tassie to be exact — and it seems the location has given them a soulful sound. A three-woman powerhouse, their vocals are strong and familiar without being derivative."

Liz Giuffre - TheMusic.com.au

"Love your album and have been spinning it on my show regularly." **Dave Barker, Star FM 98.5**

"...they're an incredible band... a really, really exciting group, huge voices" **Ryk Goddard, ABC Radio Hobart**

Get the album!

'Blind'

"Hailing from Australia's "deep-south" (Hobart, Tasmania), **Mama K and The Big Love** perform all original, old school funk, soul, and rhythm n blues. – Think The Blues Brothers with Aretha out front,"

The debut record was recorded late last year at Red Planet in Hobart by producer Stewart Long (Violent Femmes, Luca Brasi). The album was tracked through a 1975 Vintage Harrison Recording Console and mixed to a Vintage Studer Analog Tape Deck. *"So much can be done with digital these days, but sometimes you just want some romance!"* said Stew, *"We used old gear wherever it felt good."*

The band held a successful album release party back in March. With a sold out crowd and a great performance it was a night to remember -
Checkout the video above for some LIVE highlights.
